

Migration Planning Working Template

Version 1.0 | 9 October 2026

This document illustrates an engagement deliverable. All organizations, systems and findings below are fictional. Adapt the scope, criteria and evidence requirements with the client before use.

1. Define the migration

Planning field	Complete with the client
Business objective / sponsor	_____
Systems and data in scope	_____
Source / target locations	_____
Recovery time / recovery point objectives	_____
Maintenance window / decision owner	_____

2. Map dependencies

Record databases, object storage, queues, API integrations, secrets, certificates, identity providers, scheduled jobs, monitoring and backups. For each dependency, name its owner, location and required change.

3. Set the acceptance gates

Agree data reconciliation checks, performance thresholds, security controls, restore tests and sign-off requirements. Confirm which checks must pass and who may approve exceptions.

4. Cutover runbook

Sequence	Activity	Owner / evidence
1	Confirm go/no-go criteria and communication	Decision owner / approved checklist
2	Take verified recovery point; prepare synchronization	Database owner / backup and replication logs
3	Apply the agreed write-control and final synchronization	Application owner / synchronization result
4	Switch traffic and run smoke and reconciliation checks	Release owner / checks and transaction totals
5	Monitor service health and decide acceptance or rollback	Operations / metrics and decision record

5. Rollback conditions

Stop if: _____

Authority to invoke rollback: _____

Steps to restore traffic and preserve transaction consistency: _____

Maximum allowed cutover duration: _____

6. Stabilization and handover

Define the observation period, alert thresholds, escalation contacts, retained evidence and responsibility for source-environment retirement. Do not delete source data until retention obligations and acceptance conditions are confirmed.

Approval record

Technical lead: _____ Compliance reviewer: _____

Business owner: _____ Approved window: _____
