

Release Validation Sample Evidence Record

Version 1.0 | 9 October 2026

This document illustrates an engagement deliverable. All organizations, systems and findings below are fictional. Adapt the scope, criteria and evidence requirements with the client before use.

Release identification

Example release: Payments API v2.4 (fictional). Environment: staging. Candidate version / commit: record exact identifier. Target release date: agree with the decision owner. Overall recommendation: HOLD pending the failed recovery check below.

Agreed checks

Check	Acceptance criterion	Illustrative result
Configuration	Required settings and secrets present; no test credentials	PASS / EV-C01
Integration	Critical payment and reconciliation paths complete	PASS / EV-I01
Performance	Agreed throughput and latency threshold sustained	NOT RUN / threshold not agreed
Recovery	Restore and rollback rehearsal meet agreed objectives	FAIL / recovery rehearsal incomplete

Evidence requirements

For every check, retain execution date, environment, candidate version, test method, result and evidence reference. A result without retrievable evidence remains unverified.

Exception and remediation register

Issue	Impact / action	Owner / due date
EX-01 Recovery check incomplete	Release cannot be recommended until the agreed recovery rehearsal is recorded.	Operations owner / agree date
EX-02 Performance criterion missing	Agree representative load and measurable thresholds; execute the test.	Engineering and business owner / agree date

Release decision

Decision: ☐ Approve ☐ Approve with documented exceptions ☐ Hold

Decision owner: _____ Date/time: _____

Accepted exceptions and rationale: _____

Required follow-up and owner: _____

Operating readiness

Confirm monitoring, escalation contacts, runbooks, rollback access and recovery points before approving production release. Validation evidence supports the decision; it does not replace the accountable release owner.

Handover record

Runbook location: _____ Support owner: _____

Escalation contact: _____ Acceptance record: _____
