

STARTER PACKAGE

From N250,000

Best for small businesses needing a professional online presence

Engage — Asset Inventory & Discovery	
Technology Asset Inventory/ Stakeholder Sessions	Complete catalogue and discovery of every system, tool and integration your business runs on to capture goals, pain points, and priorities
Business Goals Alignment	Modernization roadmap anchored to your specific business outcomes — not generic best practices
Assess — AI-Powered Analysis	
AI Codebase Scan	Full AI scan of your codebase — vulnerabilities, debt, dependencies mapped in hours not weeks
Security Vulnerability Report	Complete list of security risks ranked by severity and urgency
Performance Bottleneck Analysis	Every slowdown identified, quantified, and prioritized for resolution
Technical Debt Mapping	Quantified breakdown of all outdated, inefficient, or broken code
Transform — Execution	
Critical Vulnerability Fixes	Patch all high and critical security issues identified in the assessment

Performance Optimization	Database tuning, caching, and code refactoring for measurable speed improvements
Basic CI/CD Pipeline	Automated build and deployment pipeline so releases are safe and consistent
Environment Configuration	Properly separated development and production environments
Updated Documentation	Clear technical documentation of all changes for your internal team
Client Portal & Revision System	
Dedicated Client Portal	Real-time project dashboard — see every task, milestone, and change as it happens
Tracker-Based Revisions	Submit feedback directly through the portal — continuous, logged, and actioned in real time
Call & Response System	You raise a concern or request, we respond and action it — fully tracked end to end
Delivery & Support	
Delivery Timeline	3 – 5 weeks depending on system size and complexity
Post-Launch Support	30 days of dedicated support after transformation is complete

Not included in this package: Cloud migration, containerization, microservices, Kubernetes, AI monitoring, full DevOps pipeline. Available in Package 2.
